

I. 본 도면은 재료두께 T0.4에 준함 설계치수를 표시하고 있음. 재료두께를 0.5㎜로 변경 시 작업 가능하도록 금형 제작 할 것.

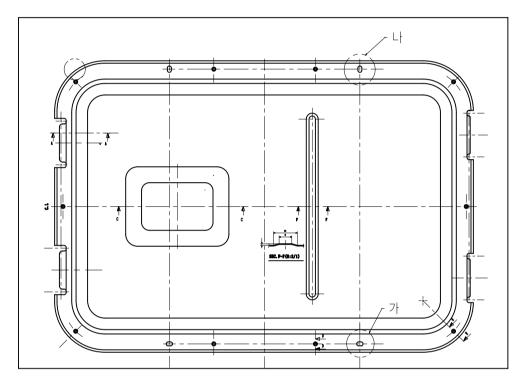

2. ➋, ◐부는 금형제작 시 위치 및 형상변경 가능한 구조로 제작할 것.

3. 흠집, 변형, BURR 등은 한도견본 관리함.

4. 정반 위에 놓았을 때 전체 휨은 2㎜ 이내 일 것.

5. 표시하지 않은 공치는 공치표에 준할 것.

6. \*표시 항목은 주요 치수 항목 임.

I. 검사 시 동일부위는 치수가 부여된 부위와 같이 반드시 측정할 것.

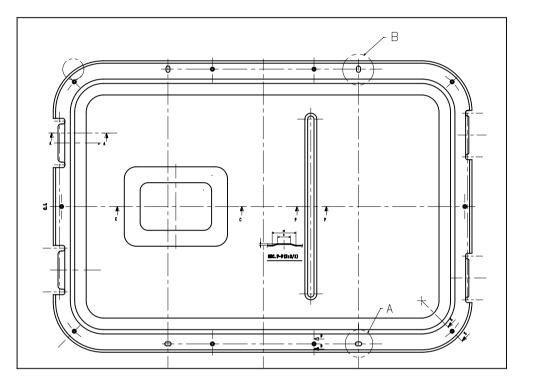

# 친환경 시방

1. 유해물질 관리기준

본 부품에 금지물질(Pb,Cd,Hg,Cr+6,PBB,PBDE)이 포함되지 않도록 하고, 상세내용은 LG(63)-A-5501-34를 만족 할 것.

## WORK SPECIFICATIONS

- l. This drawing is based on the material thickness of TO.4. It indicates the design size. When the thickness is to be changed to 0.5mm, the molds should be made carefully so that they do not give any problems in the easy production processes.
- 2. The parts marked A and B should be manufactured in a way that they can be changed when making the molds.
- 3. Scratches, deformations, burrs, etc. should be controlled according to the limitation sample.
- 4. The total twist should be within 2mm when it is put on a flat plate.
- 5. Unspecified tolerance should comply with tolerance table.
- 6. The \* marked dimensions are important.

# CHECK SPECIFICATIONS

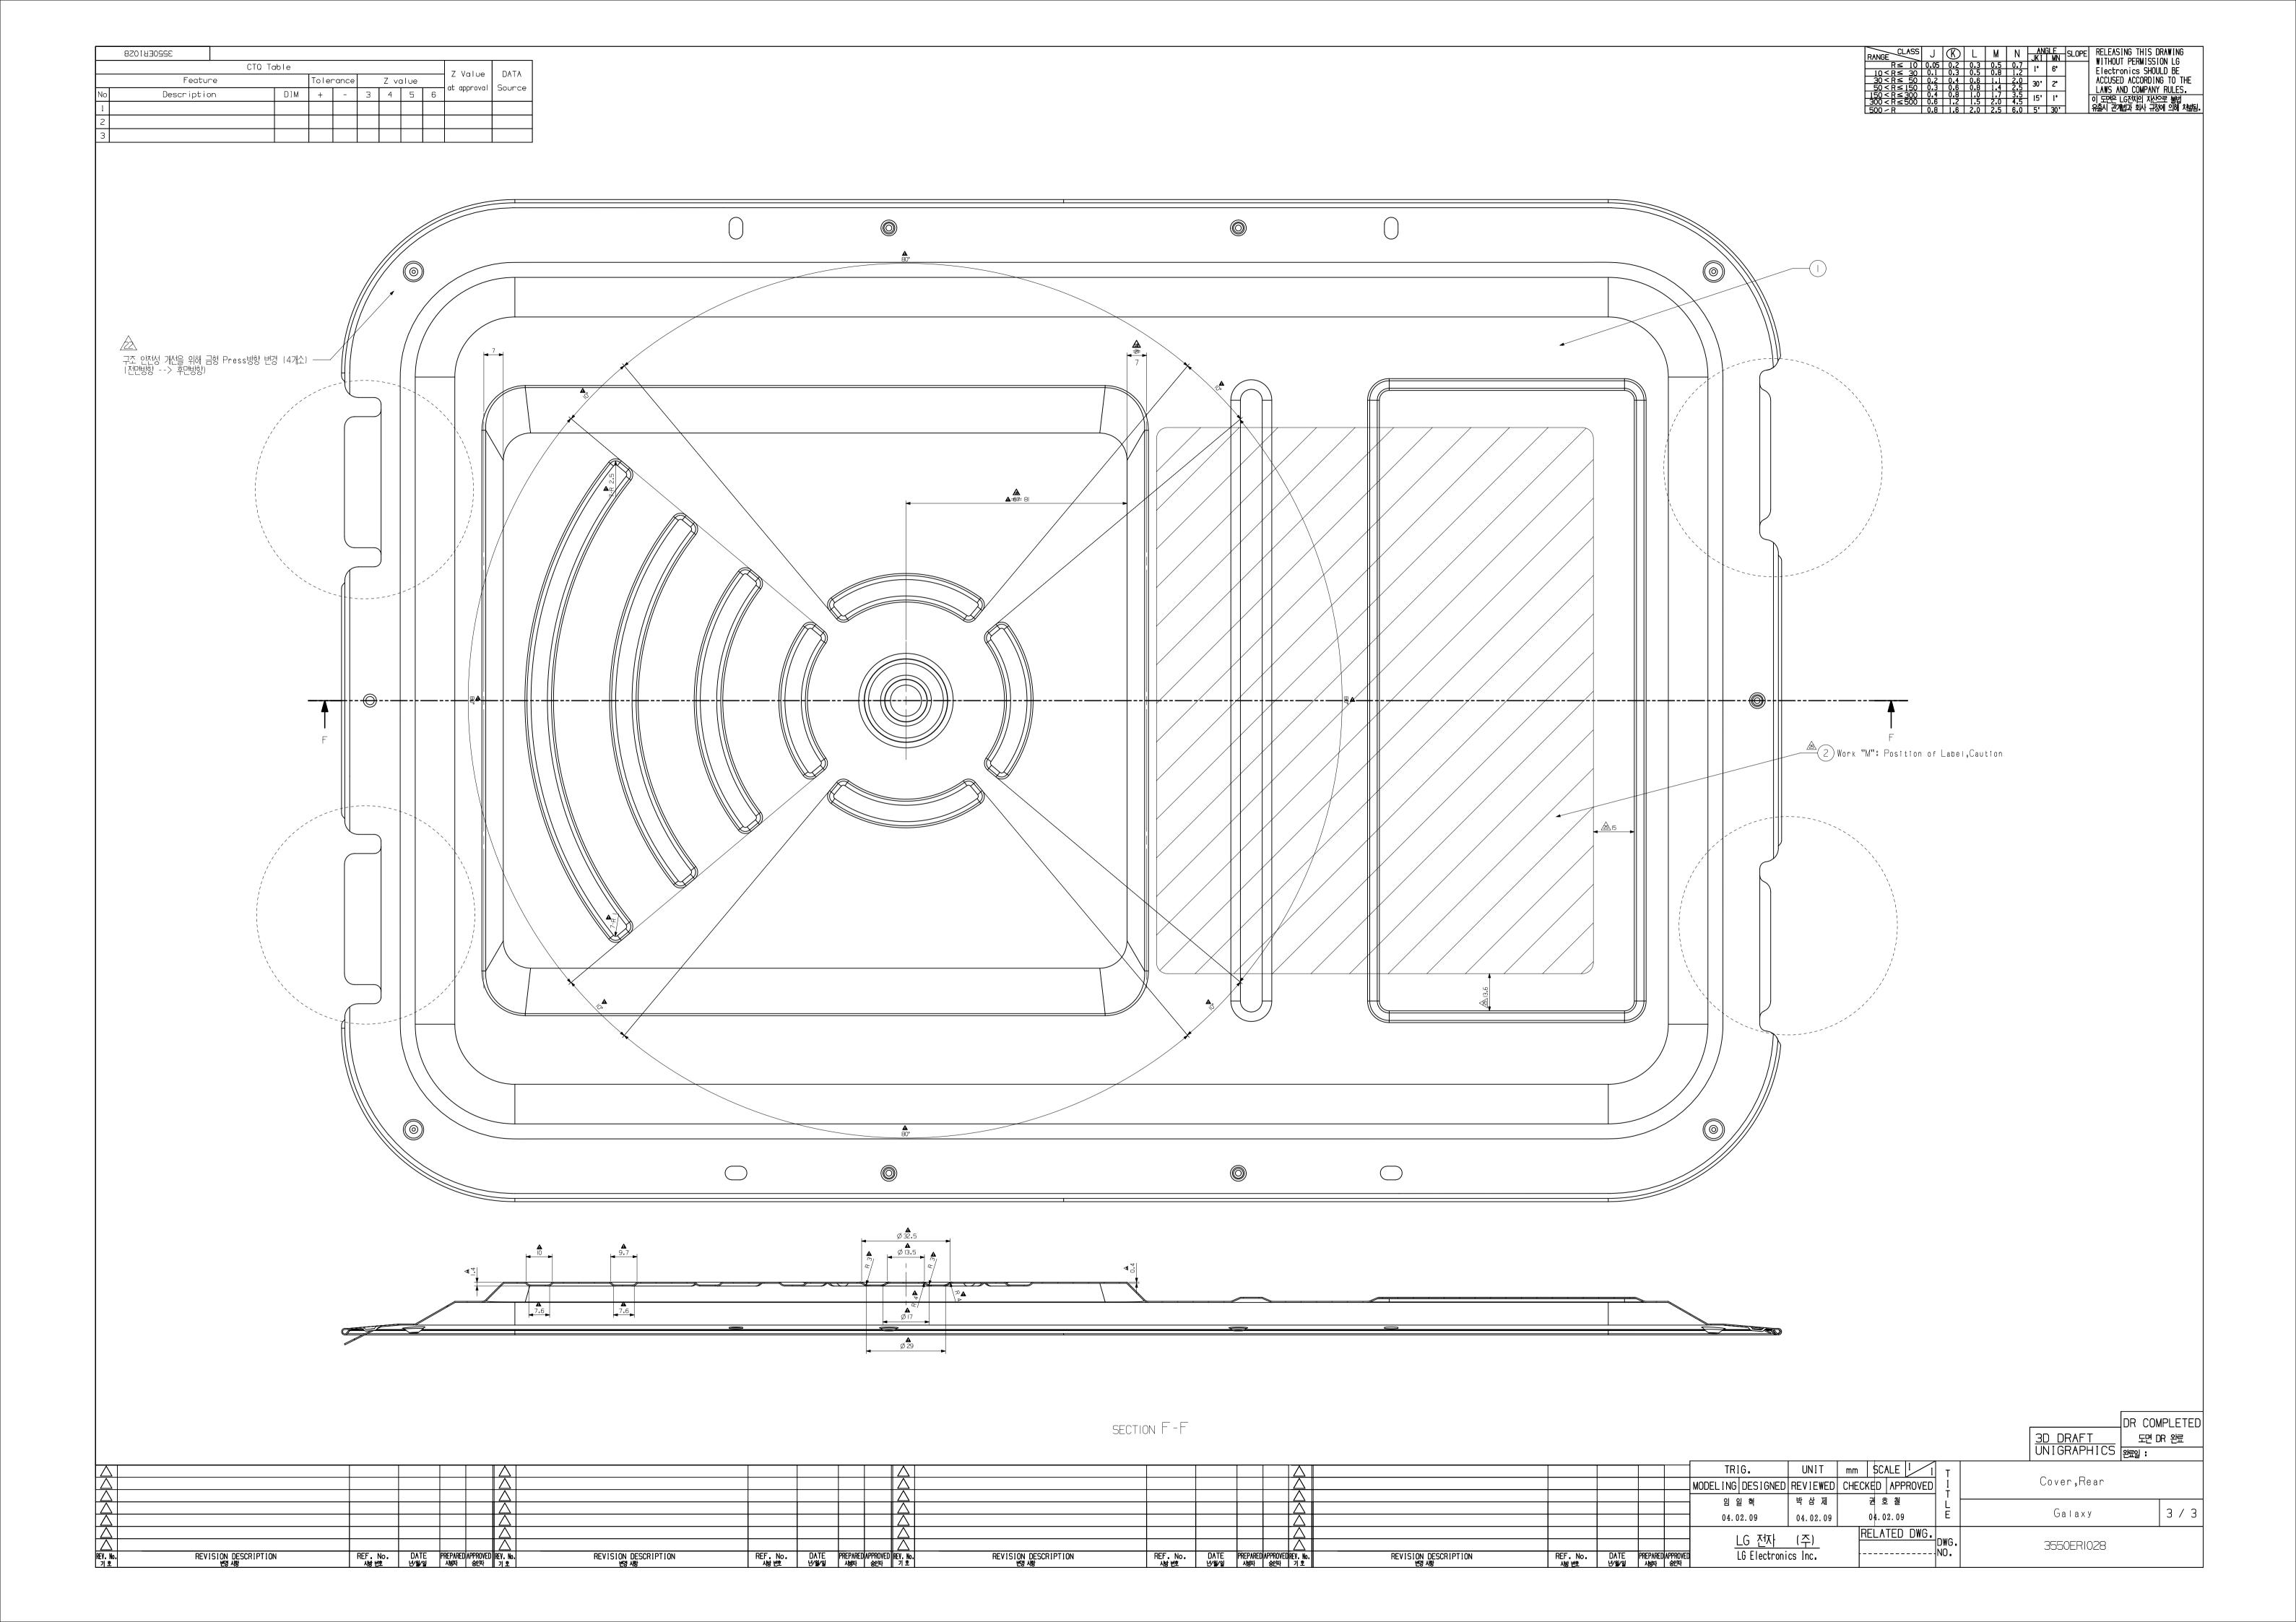

l. The positions for which the sizes are not specified should be measured according to the positions to which the same sizes are assigned.

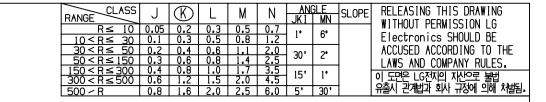

# ECO DESIGN SPECIFICATIONS

l. Standard of supervision for hazardous material

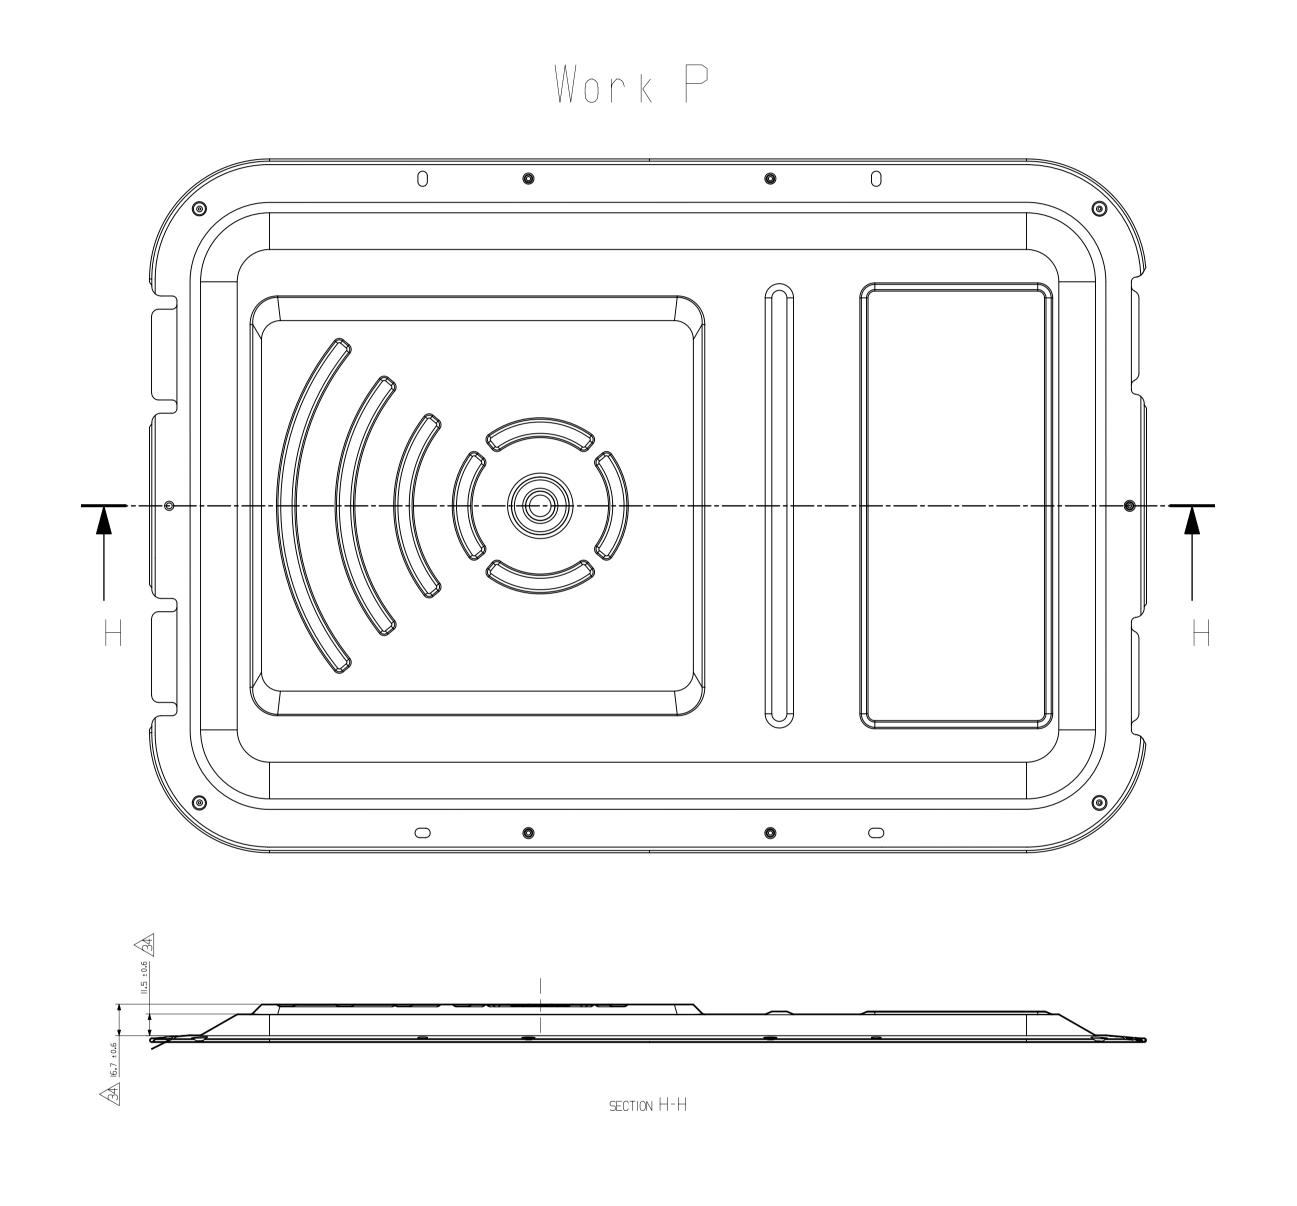

The part should not contain prohibited substances(Pb,Cd,Hg,Cr+6,PBB,PBDE) and details should comply with LG standard of LG(63)-A-5501-34
